### **First Phase Of Lompoc’s New Financial Management System Goes Live** *Self-service vendor portal now launched, with more phases to follow*

**LOMPOC, CA, Oct. 6, 2017** – The City of Lompoc is pleased to announce the go-live this week of the first phase of the city’s new financial management system.

The Munis Financial Management System, provided through Tyler Technologies, enables Lompoc residents to receive real-time information, including quick and accurate information needed for state and federal reporting.

This new system is scheduled to be rolled out a few systems at a time, having started in November 2016 and finishing around August 2019. The phase rolled out this week includes core financial systems and system-wide services such as accounts payable, accounts receivable, budgeting, purchasing and financial reporting.

As part of the first phase, the City of Lompoc’s self-service vendor portal has been established and can be accessed here: [Vendor Portal](#). Through this portal, bids can be submitted online, and vendors can be paid electronically and view invoices paid to them.

The next phase to be rolled out in the Munis Financial Management System includes human resources and payroll. Future phases will include updates for utility billing, treasury operations, and development services.

Management Services Director Brad Wilkie said the roll-out of the city’s new financial management system is going smoothly.

“Our new City of Lompoc Financial Management System will be a tremendous asset to our community, and the self-service vendor portal is an important part of this system,” he said. “This new tool enables us to pay our valued vendors quickly and easily, and gives our vendors the ability to access useful resources and information whenever needed.”

### **City of Lompoc**

The City of Lompoc was founded as a town in 1874 and incorporated as a city on Aug. 13, 1888. Prior to the City's establishment, the building of La Purisima Mission in 1787 marked the earliest European settlement in the Lompoc Valley. Growth in the Lompoc Valley was sparked by the 1901 completion of the coastal railroad between San Francisco and Los Angeles, which included the extension of a spur into Lompoc. The Lompoc Valley is home to Vandenberg Air Force Base, the first missile base of the United States Air Force. Today, the City of Lompoc is a travel destination known for its downtown mural program, local wines and acclaimed cuisine, historic landmarks, parks and nearby beaches. For more information, visit:
